ONE AGENT, ONE CONSOLE, ALL ENDPOINTS

KEY FEATURES

Complete Attack Context

ArmorPoint's cloud-based SIEM transforms MDR with complete visibility of attacks—identifying root causes and tracking across endpoints, identities, applications, and clouds—helping the SOC team to understand, visualize, and stop threats 24x7.

Next-Gen Antivirus Protection

ArmorPoint's Endpoint Detection and Response agent is lightweight, operating at the user level to provide superior protection and control without compromising device performance.

Personalized Incident Response Guidance

Automatically neutralize threats across your entire network with just one click using our proactive resolution system, or choose to have our team do it for you, ensuring comprehensive support and effective remediation.

Direct Access to ArmorPoint Analysts

While some solutions may limit the scope of critical data they capture because of limitations in processing or storage capabilities, ArmorPoint collects and analyzes 100% of event data as it happens.

Get Fully-Managed Endpoint Security.

Adopt a holistic endpoint protection strategy, leveraging modern solutions that tackle alert fatigue without restricting data gathering capabilities.
