

SOLUTION BRIEF

Human Risk Management.

Do More Than Check the Box.

Managing human risk is an essential aspect of any risk management program. ArmorPoint's Human Risk Management solutions are strategically crafted to change user behavior, create a proactive stance against cyber risks, increase overall cyber awareness, and empower your employees with the skills to promptly detect and counteract cyber threats.

CORE CAPABILITIES

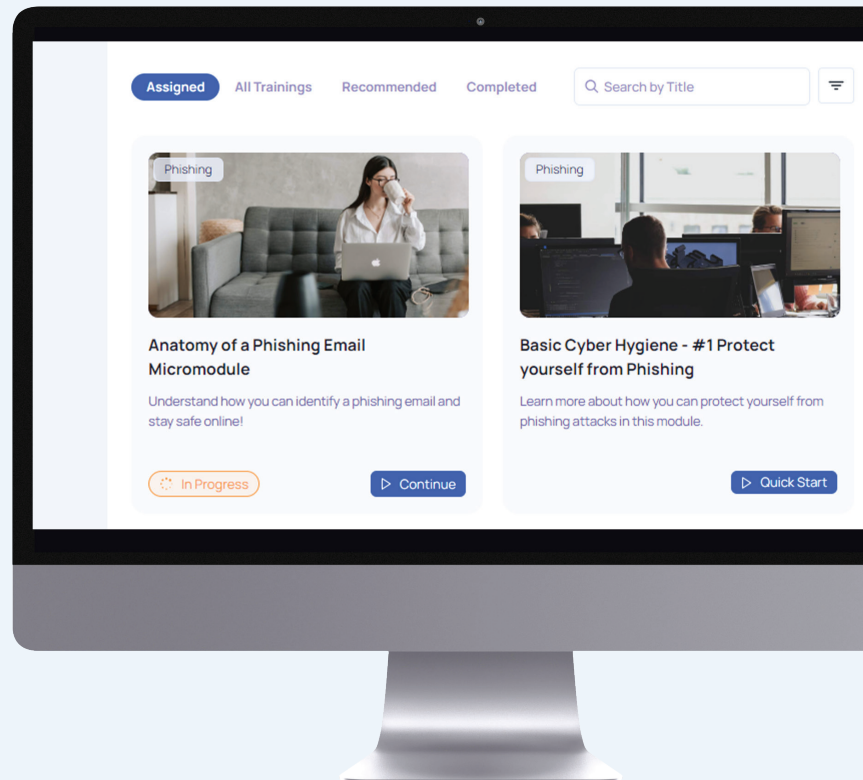

- Instantly deploy tailored training to relevant individuals, fostering effective behavioral change
- Captivate users with unique, gamified learning experiences, featuring customized content
- Equip users with the knowledge to spot and handle threats before escalation
- Provide immediate corrections, reinforcing key cybersecurity concepts
- Quickly identify and remove sophisticated phishing threats from all corporate inboxes with a single click

*"95% of all breaches involve humans, making people **the most significant cause of cyberbreaches.**"*

CORE SERVICES

Cybersecurity Awareness Training

Cultivate a cyber aware workforce, offering a comprehensive approach to educating, testing, and reinforcing good cyber hygiene practices amongst your team, transforming them into your strongest defender against relentless threats.

- Customize training content to suit your organization's unique requirements
- Utilize gamification and individualized content to ensure retention and practical application
- Give employees real-time feedback to instantly correct mistakes and internalize lessons
- Dive into comprehensive metrics and reports to pinpoint breach-prone employees
- Integrate with Active Directory or simply provide us with a .csv for turn-key implementation

Phishing Simulation Exercises

Phishing simulations are a critical part of building cyber awareness. ArmorPoint's Phishing Simulation services offer targeted, realistic phishing attack scenarios aimed at enhancing your organization's resilience against sophisticated phishing threats and improving overall cyber awareness.

- Tailor simulations to mirror daily scenarios, boosting engagement and efficacy
- Schedule regular, sophisticated phishing tests with minimal manual effort
- Reinforce learning and improve phishing defense skills with instant educational training

Phishing Remediation

ArmorPoint's Phishing Remediation service streamlines the way security teams handle phishing threats. With Email Quarantine Automation (EQA), instantly search, locate, and isolate malicious emails across all employee mailboxes with just a simple click.

- Integrate seamlessly with major enterprise SaaS email platforms
- Get rapid response to new and emerging email threats
- Access a comprehensive, end-to-end phishing defense solution

Transform Your First Line of Defense.

The modern business world demands a more automated and personalized approach to managing human risk. ArmorPoint's Human Risk Management solutions pinpoint which of your employees are most breach prone, and automate targeted training to them in real-time to reduce risk and change behavior.
