

Solution Brief

BlueVoyant Supply Chain Defense

Comprehensive, highly configurable third-party cyber risk management

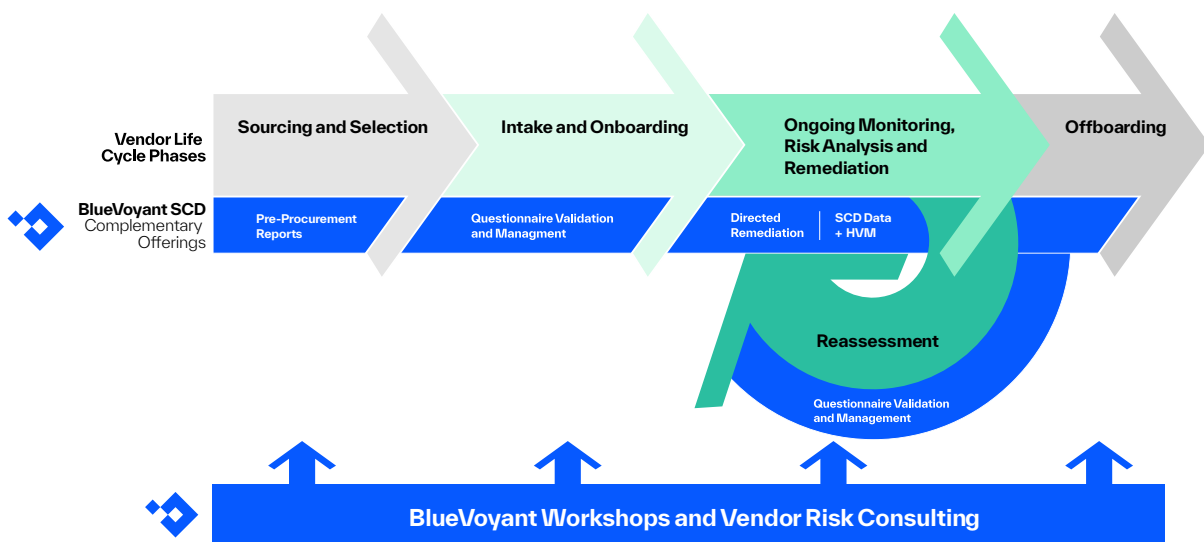

Technology enabled, expert driven, measurable risk remediation

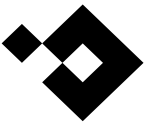

BlueVoyant Supply Chain Defense (SCD) is an end-to-end, comprehensive solution that delivers quantifiable risk reduction across your entire third-party ecosystem, higher levels of efficiency to risk management processes, and greater visibility across your supply chain.

SCD drives cyber risk reduction at every stage of the third-party lifecycle, from sourcing & selection, on through ongoing monitoring and reassessment. The highly configurable solution set includes multiple levels of continuous monitoring based on vendor risk levels, a customizable and AI-driven questionnaire management and validation platform, and point-in-time risk assessments to support procurement and M&A decision making.

Solution Set Highlights

- > Visibility and prioritization of your entire third-party ecosystem via validated mappings of externally-facing digital infrastructure
- > Continuous monitoring of third parties with guided remediation by Risk Operations Center analysts for faster mitigation of risk and measurable risk reduction
- > Identification and notification of Zero-Day vulnerabilities in as little as 90 minutes following disclosure
- > Monitor the full breadth of vendors you previously could not, regardless of criticality or resource constraints, with automated continuous monitoring
- > On-demand, easy-to-understand snapshots of acquisition or procurement targets' cyber risk posture
- > Unique capability to validate vendor questionnaire responses through an automated platform for storing and managing cyber and risk questionnaires

Seasoned Expertise and Advising for Program Creation and Management

All SCD offerings are supported by the availability of expert third-party risk advisory workshops and consulting engagements to help manage and mature enterprise cyber risk reduction programs, as well as a fully managed professional service to help analyze and validate vendor questionnaire responses.

Supply Chain Defense Offerings

A single configurable solution set to meet your third-party cyber risk management needs

Continuous Monitoring

CURATED MONITORING & DIRECTED REMEDIATION

SCD Core Offering: Analyst-reviewed, detailed third-party cyber risk reduction solution. Identifies, prioritizes and guides vendors on specific risk remediations.

SCD DATA

Automated cyber risk visibility with granular information and analysis on vendor risks, but results are not curated by ROC Analysts.

HIGH VOLUME MONITORING

Automated cyber risk visibility through data feeds provides continuous monitoring of lower-priority vendors at a lower price point.

BUSINESS RISK MONITORING

Continuous risk monitoring and analyst-validated risk event detection across eight (8) additional types of business risk beyond just cyber, including factors like financial risk and foreign influence.

Questionnaire Management

SCD DATA

Automated cyber risk visibility with granular information and analysis on vendor risks, but results are not curated by ROC Analysts.

Point in Time Assessments

PRE-PROCUREMENT REPORTS

Informed summary reports on a target vendor's cyber risk posture for procurement decisions.

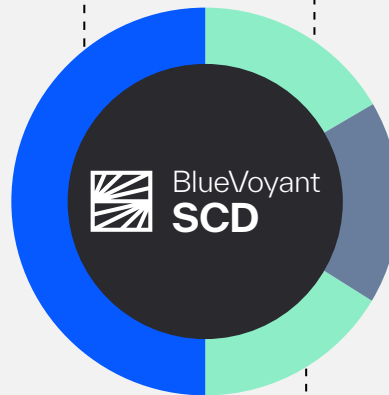

DUE DILIGENCE REPORTS

Detailed, comprehensive analysis of an acquisition target's risk posture.

Vendor Risk Program Consulting

CLIENT ADVISORY WORKSHOPS & VENDOR RISK CONSULTING

Expert-led workshops and consulting services to complement our products and help grow customers' third-party risk management programs.
