

## Solution Brief

# Virtual CISO

## Improve your security posture while easing the burden on your team

### How Do You Fill Your Resource Gaps?

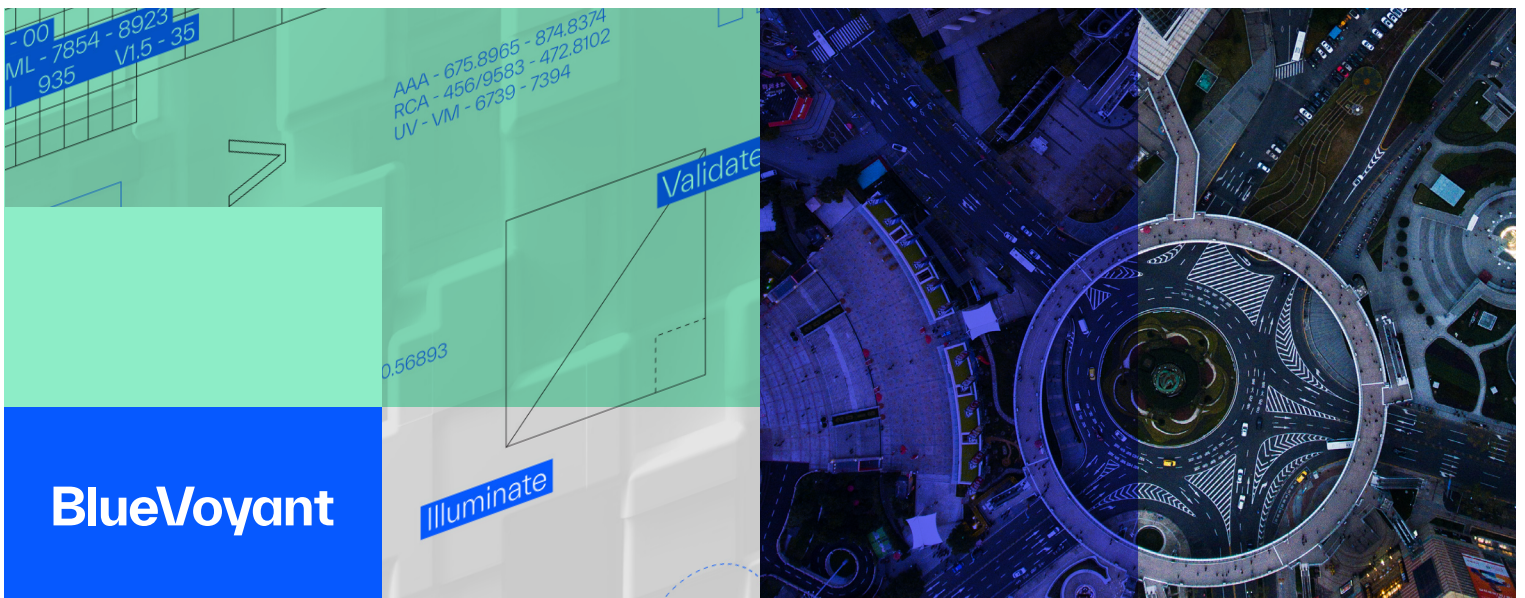

Cybersecurity teams face a growing challenge to recruit and retain staff with the skill sets needed to manage advanced cyber technologies and security programs. Demand for qualified candidates is outpacing supply worldwide, and many organizations find that without the right people in place, progress of their security programs is at risk.

### Virtual CISO Provides Expert Leadership For Your Security Matters

BlueVoyant's advisors can be your Virtual CISO to help execute planning, monitoring, and managing tasks. Whether you are planning to create or improve your compliance program, perform technology optimization and rationalization, or develop your security roadmap to improve posture, we can help. We can provide project-specific monitoring for compliance alignment or expert-level direction and planning in the areas of information assurance, governance, and information risk management. We can manage your vendor risk, compliance, or your security services oversight. Our services can be project-specific, or purchased as an ad-hoc retainer. We provide remote support with on-site assistance based on customer needs.

### Key Differentiators

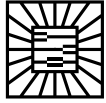

- Our advisors include former government cyber officials with extensive frontline experience in responding to advanced cyber threats on behalf of the the NSA, FBI, and GCHQ.
- Flexible corporate engagements can cover multiple security domains.
- Advisors have developed, implemented, and guided the execution of cybersecurity transformation roadmaps for Fortune 10 organizations.
- Our seasoned analysts are backed by BlueVoyant's full suite of products and services.
