

Managed Extended Detection & Response (MXDR)

24x7 Enterprise Protection. Unified.

Solutions Brief

Total protection, leave no room for security gaps

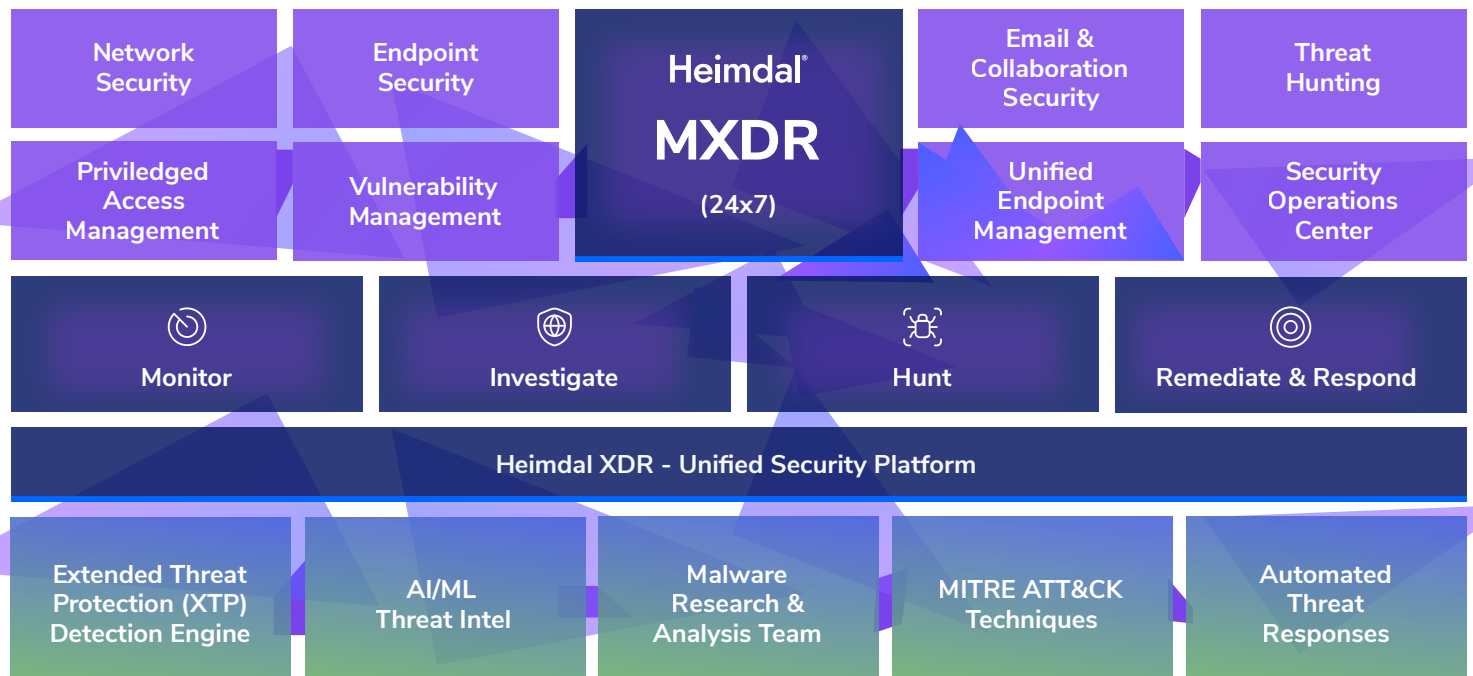

Securing enterprises has become increasingly challenging today. The growth of distributed workforces, the increasing sophistication of attacks, and the growing dependence on third-party vendors have significantly expanded the attack surface, making it more complex than ever before.

Proactive detection and coordinated response are critical in minimizing the impact of a cyberattack. To achieve tangible security benefits, it is essential to swiftly identify genuine threats amidst the noise of alerts, and promptly mitigate these threats across the entire enterprise, while ensuring a comprehensive response.

Our MXDR service is powered by the acclaimed Heimdal XDR - Unified Security Platform and is specifically designed to help modern enterprises stay safeguarded by integrating detect-and-respond services with the industry's broadest coverage for total protection against cyber threats.

Benefits of Heimdal MXDR

- Achieve environment-agnostic implementation & realize immediate enterprise protection with Heimdal's unified platform approach.
- Minimize enterprise-wide security risks with 24x7 proactive monitoring & threat remediation.
- Dramatically reduce MTTD and MTTR with proactive and automated responses across the network, endpoints, emails, access, identity, & more.
- Benefit from Heimdal's accredited SOC team with defensive and offensive capabilities & decades of global experience.
- Eliminate alert fatigue for teams by streamlining critical & imminent threats without manual processes.
- Address SecOps skills shortages and allow internal teams to focus on critical objectives while relying on Heimdal for advanced investigations & forensics.

The Heimdal MXDR is Unmatched

Our proactive team of experts and accredited Security Operations Center (SOC) works in real-time and closely with your IT and Security counterparts to create an integrated approach to threat-hunting and response.

AI-driven Detection

Advanced and comprehensive detection from machine learning, behavioral pattern, threat visualization

Unified Intelligence

Leverages the extended power of the Heimdal suite across threat intelligence, telemetry, and detection rulesets to provide evidence-based results

Advanced Investigation

Team of experts to augment skills gap with swift investigation and response to avoid any downtime or loss of productivity

Evolving Security

Proactive security level tailoring by team of expert defenders based on threat volumes and sophistication for aiding IT policy enforcement that is pragmatic

Instant Deployment

A lightweight solution that requires minimal configuration and with protection up and running instantaneously

Managed Services

Managed detection, response, and training services to provide the skills and the 24x7x365 reinforcements your business needs

Why choose the Heimdal as your security partner?

Heimdal is an industry-leading unified and AI-powered cybersecurity solutions provider established in Copenhagen in 2014.

With an integrated approach to cybersecurity, Heimdal has dramatically boosted operational efficiency and security effectiveness for over 15k+ customers globally.

Heimdal empowers CISOs, Security Teams, and IT admins to enhance their SecOps, reduce alert fatigue, and be proactive using one seamless XDR security platform.

Our award-winning line-up of 10+ fully integrated cybersecurity solutions span the entire IT estate, allowing organizations to be proactive, whether remote or onsite.

That's why our product line and managed services offer solutions for every problem, whether at the endpoint or network, in vulnerability management, privileged access, implementing Zero Trust, thwarting Ransomwares, preventing BECs, and much more.

“I would recommend Heimdal because their support is fast and very good at explaining what they intend to do and even reaching out if they see weird things in our environment.

All in all, I would recommend Heimdal to my peers any day.”
