

# GET IT DONE...

## COMPREHENSIVE

**Everything you need;  
today, and tomorrow...**

Partial solutions don't get *IT* done. Modern *IT* professionals need the tools to manage every need of the business. From complete endpoint management to the latest in security and compliance, the Kaseya family of solutions gets *IT* done for you.

## AUTOMATED

**Like having an assistant  
who knows what comes next...**

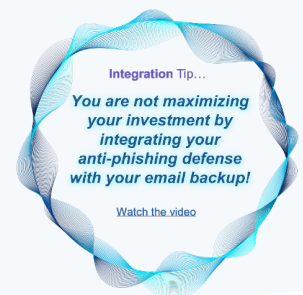

Some vendors claim integration, but most "integrations" are merely cosmetic and end up abandoned or non-functional. Kaseya *IT* Complete is a truly workflow integrated solution, engineered to predict your needs and provide the next best steps seamlessly to make you and your team more efficient.

## INTELLIGENT

**A smart assistant that helps you optimize  
your use of the tools you already own...**

Most IT professionals don't have time to read release notes, hunt down upgrades, or dig deep into the functions of the software they use. IT Complete includes an AI to drive software utilization and proactively guide and direct your team to make the most of your Kaseya software and workflow integrations.

## PRICED-RIGHT

**Budgets have limits.  
Expand at YOUR pace...**

It's one thing to have to do it all, it's another to be able to afford it. IT Complete is built to support the addition of new services on your schedule, and Kaseya's solutions are among the least expensive in the industry.

Kaseya's highly-automated and integrated **VSA** remote monitoring and management solution leads the industry with seamless control of endpoints and network devices in one simple interface.

Kaseya's Security solutions include **IDAgent's** unparalleled Dark Web monitoring, password management, phishing protection, and tools to drive users toward the best security practices.

Kaseya's Backup & Disaster Recovery solutions include the **Unitrends** all-in-one backup solution empowering the automated backup of anything anywhere, On our cloud or yours.

Kaseya's Audit Suite enables your team automate network, security and application (SQL/Exchange) audits with customizable reports in minutes.

Kaseya's Compliance Suite helps protect any business with an out-of-the-box set of tools to make HIPAA, GDPR and other regulatory practices easy to follow.

Kaseya's Payments Suite helps you manage secure payment processing, increase transaction security & compliance, and decrease the typical costs an SMB pays in processing fees.

Kaseya's PSA & Service Desk (**BMS/Vorex**) solutions make the management of IT tasks a snap, and integrate directly with VSA, and documentation solutions to streamline your workflow and save time.

Kaseya's IT Documentation leverages the proven power of **ITGlue** to ensure access to critical information where and when you need it to speed through tasks and make the job easier for the whole team.

## It's not about ONE THING; it's about EVERYTHING...

Modern IT Management solutions have to help IT professionals save time, save money, and work more efficiently. The best way to accomplish those goals is with low-cost, well-designed, integrated tools that help you recapture hours of your day from the hassle of jumping between apps, interfaces, documentation, ticketing, and more. An integrated suite of tools with a common look and feel, smart integrations to save time, and sold at affordable prices...

That's IT Complete. Tailor-made for the modern IT professional.
