

Pentera Surface

Pinpoint True Web-facing Security Gaps

Harden Your **External Attack Surface**

Continuously map your organization's external attack surface, launch safe-by-design attacks, and prioritize exposure remediation to see your most attractive assets the way an adversary would.

Key Product Pillars

Attack Surface Monitoring

Gain complete visibility of your external assets and get alerts about new external-facing exposures.

Adversary Perspective

Spot configurations and attributes that indicate potential attacker entry points.

Web Exposure Validation

Safely exploit mapped assets to uncover potential attack vectors and exploitable security gaps.

Focused Remediation

Target remediation efforts on the most pressing security gaps based on proven impact.

External **Security Validation** In-Depth

Pentera safely performs all the actions an adversary would

Benefits

- + Reduce cyber risk exposure**
 Surgically identify and eliminate critical gaps with algorithm-based automated security validation.
- + Reduce third-party testing reliance and expenses**
 Minimize cost and dependence on 3rd party external penetration testing services.
 Leverage automated, enterprise-grade tests that run at scale.
- + Increase cybersecurity team efficiency**
 Automate security validation testing activities for external-facing assets, focusing your security team's attention on the assets that matter the most.

All your attack surfaces, **tested continuously** with the Pentera Platform

About Pentera

Pentera is the category leader for Automated Security Validation™, allowing every organization to test with ease the integrity of all cybersecurity layers, unfolding true, current security exposures at any moment, at any scale. Thousands of security professionals and service providers around the world use Pentera to guide remediation and close security gaps before they are exploited.
